Comfortable  
with  
LG HVAC.

## LG AIR CONDITIONERS **Ducted Split System**

**Vitalising You & Your Environment**

# Enjoy Clean, Quiet, and Comfortable Air Conditioning with LG

## Making you and your environment more comfortable

LG has a comprehensive range of air conditioning solutions designed to suit a wide range of buildings or spaces.

# DUCTED SPLIT SYSTEM

LG has a range of ducted air conditioners to suit with most type of home or office.

## Model Line-up

Ducted Split System		Capacity (kW)	EER/COP	
<b>SLIM</b>	Low Static	Indoor <b>B18AWYNGMD</b> Outdoor <b>B18AWYUGMD</b>	Cooling 5.1 Heating 6.0 3.09 3.30

## Outdoor Unit

## USER FRIENDLY CONTROL

LG air conditioning solutions allow users to take advantage of a hassle-free, intuitive management system via the controller

## EASY INSTALLATION & MAINTENANCE

The built-in evaporator safety tray makes the product much easier to install and maintain. Must be installed by a licensed installer.

## HIGH RELIABILITY & COMFORT

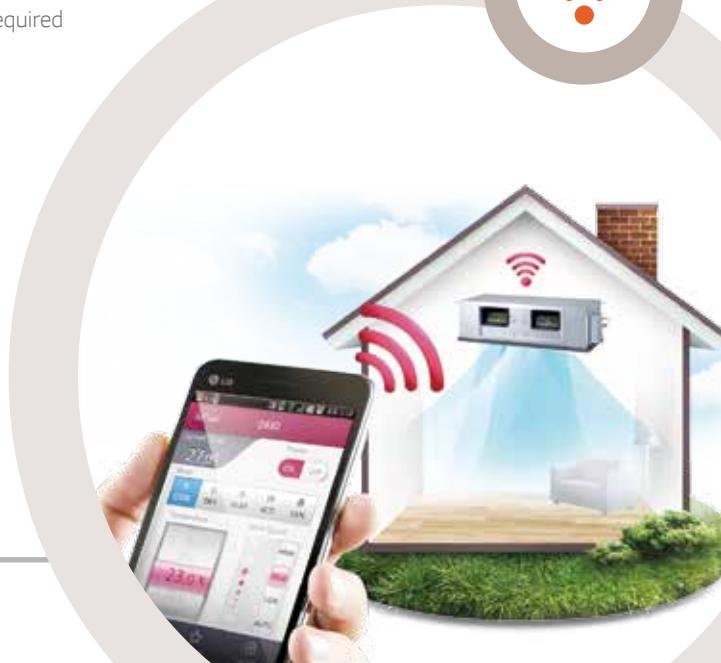

LG latest technological innovations ensure greater overall system reliability as well as convenient benefits such as quick, stable cooling and a wider operation range than conventional systems.

## SMART APPLICATION

Easily access and control your Air Conditioner from your smart phone.

\* Wireless home network required

# RELIABILITY

The revolutionary inverter technology of LG boasts powerful performance while maximising reliability.

## ► POWERFUL BLDC COMPRESSOR

LG air conditioner comes with a BLDC compressor that uses a strong neodymium magnet. Its compressor has improved efficiency and the operation range has been expanded.

Operation Frequency

● **BLDC**

Concentrated Winding

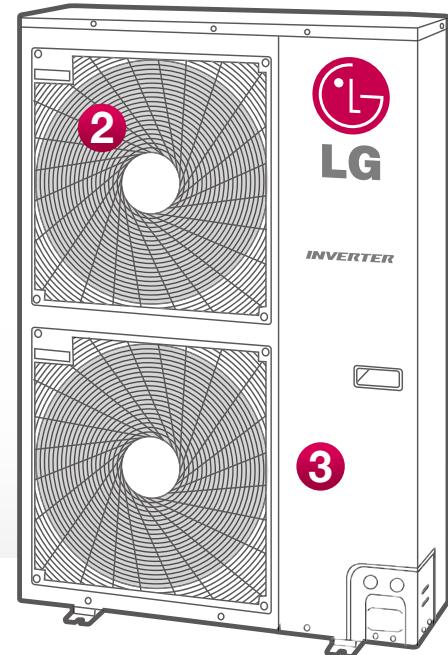

**15 ~ 100 Hz**

## ► BLDC FAN MOTOR TECHNOLOGY

The BLDC motor is made up of powerful ND magnets providing high torque, resulting in the ability to provide large air volume and high static pressure capability. This allows high speed operation at reduced electrical and mechanical noise.

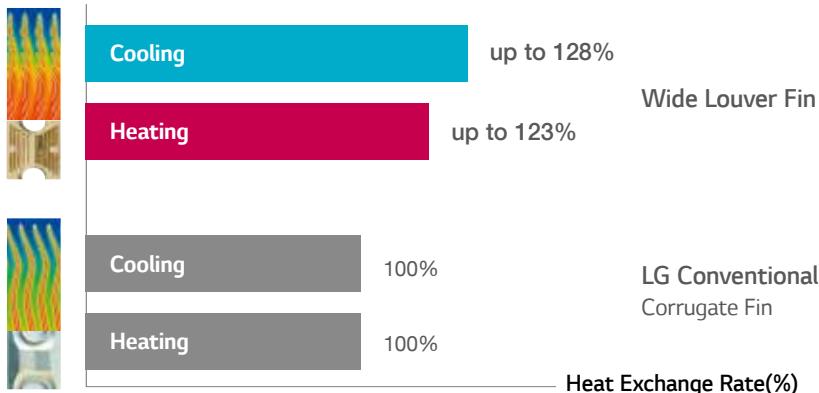

- 1 Heat Exchanger
- 2 BLDC Fan Motor Technology
- 3 Powerful BLDC Compressor

## ► HEAT EXCHANGER WITH WIDE LOUVER FIN

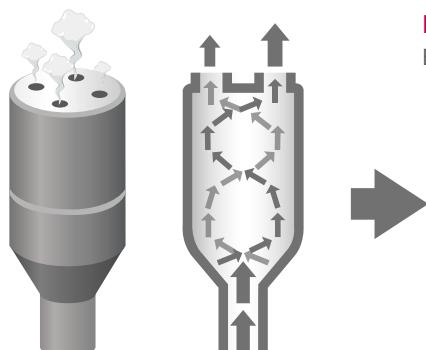

Improved heat exchanger efficiency up to 28%, applying Multi V technology.

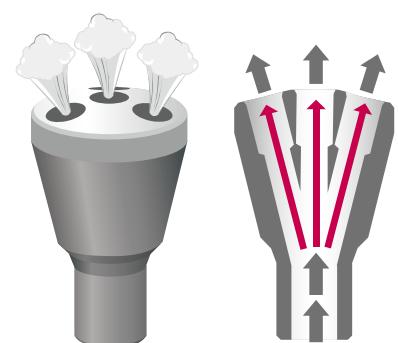

## ► OPTIMISED HEAT EXCHANGER PATH

Improved Refrigerant cycle efficiency up to 5% with equal distribution.

**Previous**  
Unequal distribution

**New**  
Equal distribution

# USER FRIENDLY WALL CONTROLLER

Three optional wall controllers are available:

1. Premium wall controller -
2. Deluxe wall controller -
3. Standard wall controller -

## ► CONTROLLER

- Premium Controller (optional)

PREMTA000

### User Friendly Design

Premium design with intuitive GUI and Standard & Simple modes allows for quick and easy control of various functions and settings for up to 16 indoor units

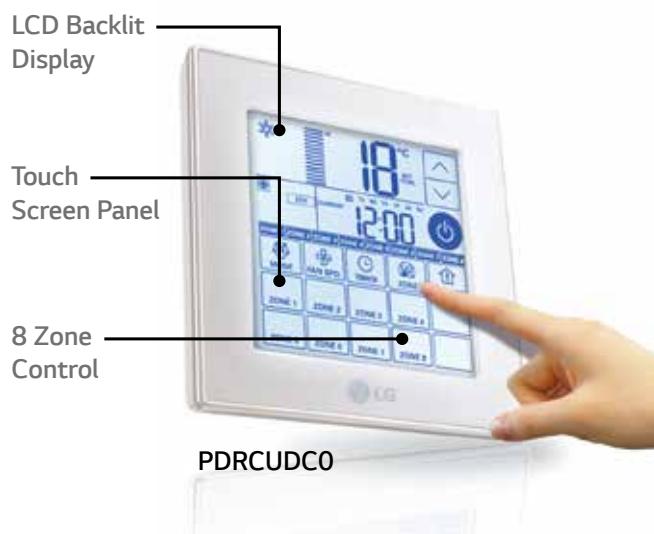

### Advanced Schedule Functions

Convenient schedule functions allow for the control of weekly, monthly and yearly time periods as well as effective management of seasonal cycles.

### Intelligent Energy Management

Energy monitoring and operational run time control including temperature lock function. Graphical representation of energy usage, target energy consumption, operation time limit and alarm pop up.

- Deluxe Wall Controller (optional)

- Standard (WIDE) Wall Controller (optional)

The operator can set the timing function of the air conditioner for a period of one week.

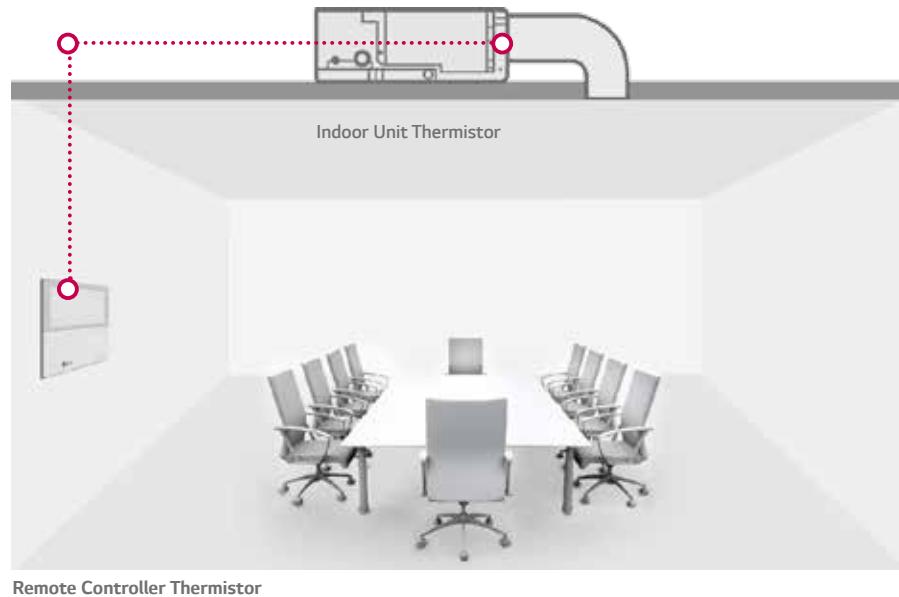

Enables you to easily see the control settings.

## ► DUAL THERMISTORS CONTROL

---

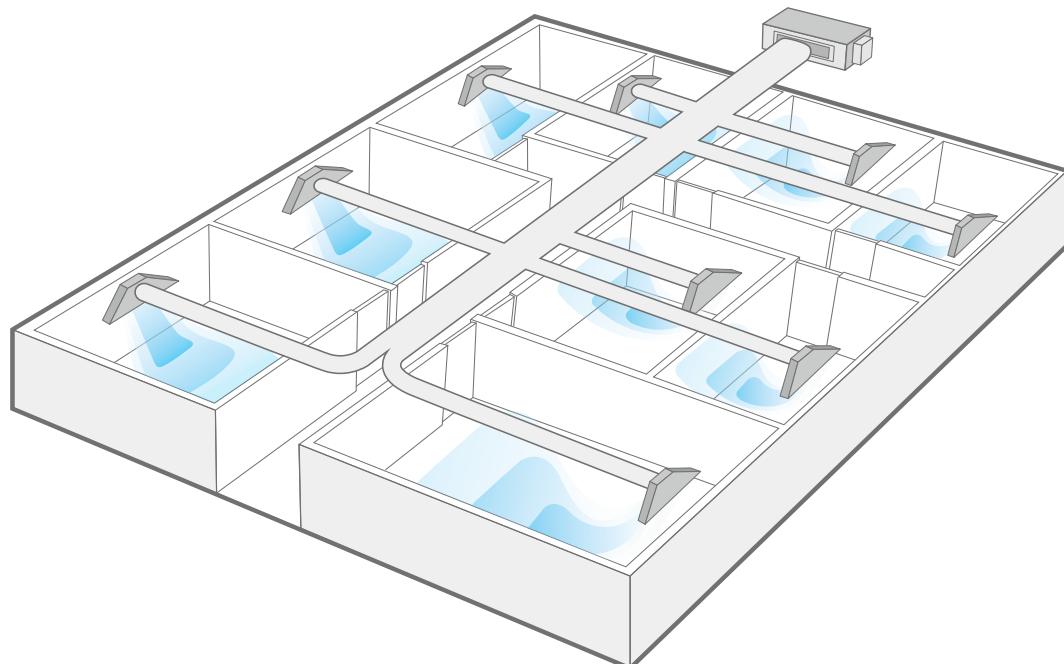

Dual thermistor control provides the option to control temperature by referring to either of the dual temperature sensors. With the help of the slide switch at the back of the LCD wired remote controller, selection of the desired thermistor for controlling the unit can be achieved. One thermistor is in the Indoor unit & the other one is in the LCD wired remote.

## ► OPERATION FOR MULTIPLE ROOMS

---

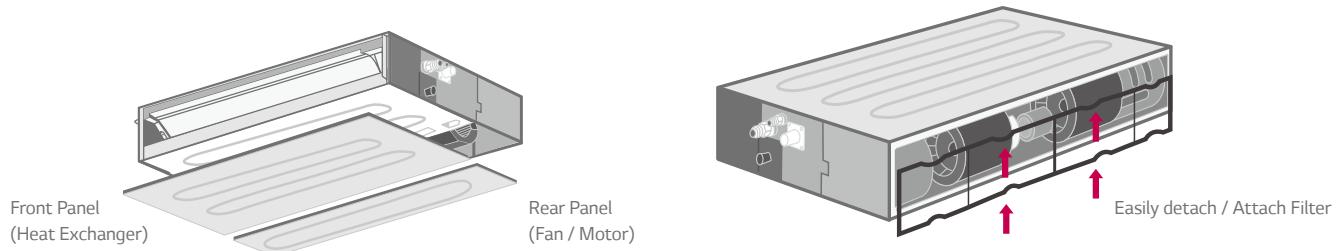

Using a duct (solid or flexible type), it is possible to operate cooling / heating for several rooms simultaneously.

# EASY INSTALLATION & MAINTENANCE

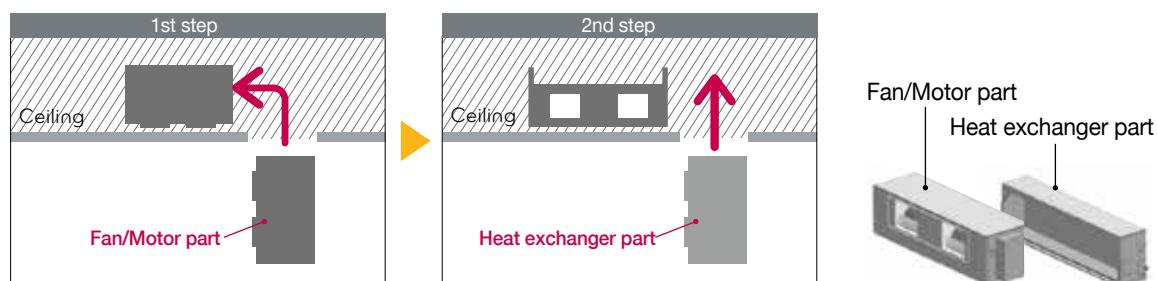

## ► EASY SERVICE & MAINTENANCE (LOW/MID STATIC DUCTED)

There is now a separate panel for the heat exchanger and fan/motor. Coupled with the fan/motor filter for easy removal and installation, maintenance of the LG unit has been simplified even in limited spaces.

## ► SPLIT TYPE INDOOR UNIT

Fan/motor part assembly and heat exchanger assembly can be separated. This enables installation of the indoor unit in two parts before final assembly.

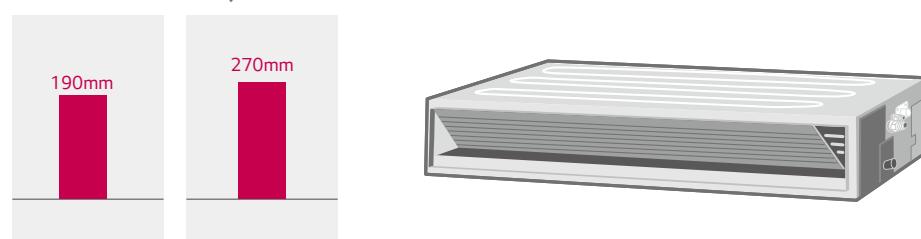

• This feature is ONLY available for B62, B70 unit.

## ► MINIMISED HEIGHT

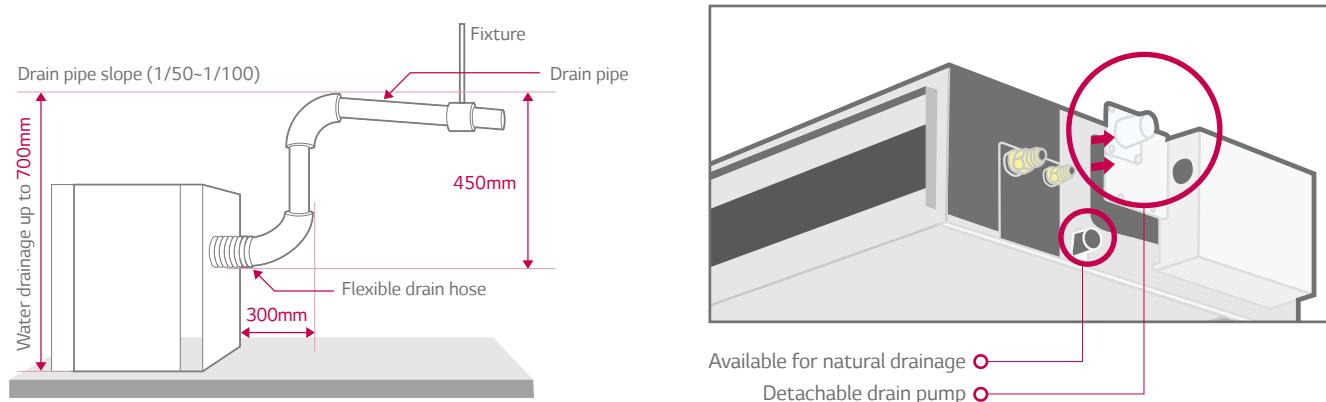

New low/mid-static ducts provide ideal solution for installation in limited space.

B18                    B24, B36

## ► HIGH HEAD DRAIN PUMP

Auxiliary Drain Pump automatically drains water. A standard drain-head height of up to 700mm is possible, which helps create the ideal solution for water drainage.

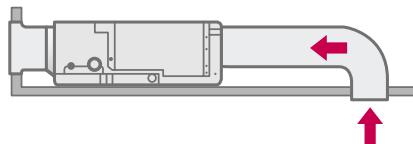

## ► FLEXIBLE INSTALLATION (LOW STATIC DUCT ONLY)

The new low static duct allows the air intake to be positioned either at the rear or bottom during installation.

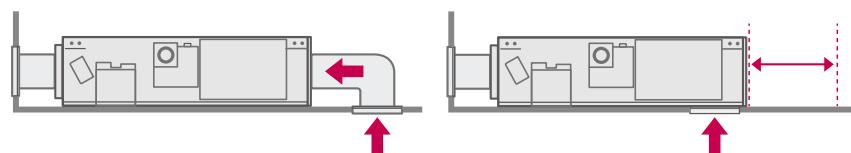

### Conventional

Air intake at the only rear

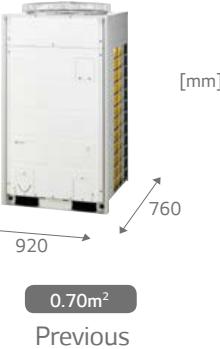

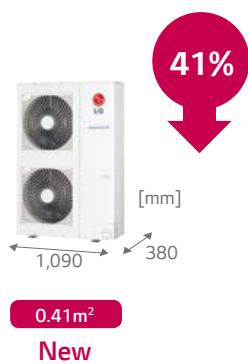

### New Low Static Duct

Air intake at the rear or bottom

## ► COMPACT & LIGHT

### • Smaller Footprint

### • Lighter Weight

# HIGH RELIABILITY & COMFORT

**Quick** Operation Response

**Wide** Operation Range -10~48°C

**Stable** Operation Performance

## ► HIGH RELIABILITY WITH PRESSURE CONTROL

### Previous LG design

Temperature Sensor Only

### Step 1

Sensing current temperature of refrigerent, indoor and outdoor temperature

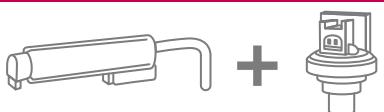

### Step 2

#### Estimating Pressure

Finding recorded target pressure to operate compressor, based on the corresponding temperature data

This algorithm is more likely to be impacted by temperature change and it takes more time to calculate proper operation range of compressor to target point.

### LG Inverter

Temperature Sensor

Pressure Sensor

### Step 1

Sensing refrigerant pressure and temperature simultaneously for faster and more exact response to load variation

This ensures target performance and reliable operation.

## ► QUIET OPERATION

The noise level of low static duct has been reduced, even though ESP has been increased.

		B18AWYNGMD
Sound Pressure (High / Medium / Low)	db(A)	36 / 34 / 31

**31 dB(A)**

**40 dB(A)**  
Library

**50 dB(A)**  
Talking

**55 dB(A)**  
Office

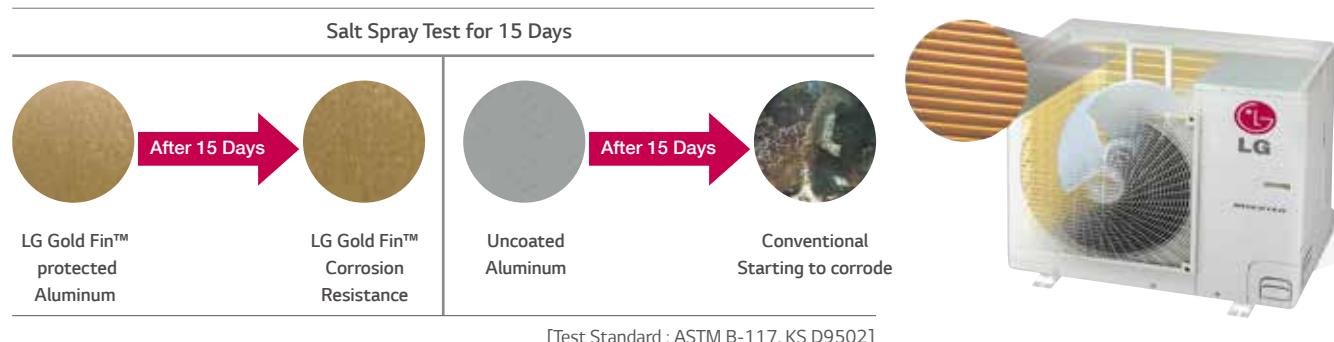

**78 dB(A)**  
Typing

## ► GOLDFINT™ ANTI CORROSION TREATMENT

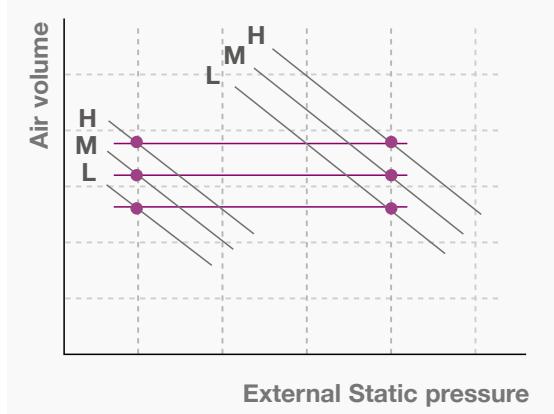

GoldFin™, is an anti corrosive treatment on the surface of the heat exchanger in the outdoor unit.

The treatment is designed to protect air conditioners from pollution and corrosive conditions and assists in the durability and longevity of the unit. This technology is a great solution for harsh Australian outdoor conditions.

## ► E.S.P CONTROL (E.S.P: EXTERNAL STATIC PRESSURE)

Air volume can be optimised to reduce noise and meet with the system design utilising E.S.P technology. This enables you to optimise duct work installation, by maintaining airflow and sound levels as required.

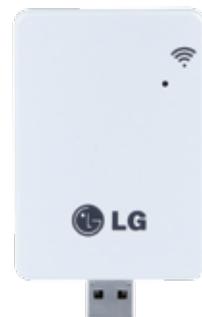

# SMART APPLICATION (OPTIONAL)

The ducted split system can be controlled by your smart phone using the LG Smart AC app. You can control settings such as on-off, operation mode (cool, heat, auto and fan), set desired temperature and adjust fan speed with the purchase of the optional WLAN module.

**WLAN Module (Optional)**

• Not available on B18-24-36 AWYNGMD

## ► WI-FI SMART CONTROL

Power and temperature control from your smart phone

LG Smart AC App lets you easily access and control your air conditioner from your smartphone

### Compatible Devices

- Android Phone (ver. 2.3 or Higher) 
  - Apple iPhone (iOS6 or Higher) 
- \* Not available for Low, Mid Static model

## ► MY FAVOURITE SETTING

### The Perfect Setting for Me

Create your own settings with ease.

Enables you to save and easily access your favourite settings.

## ► ZONE CONTROL

Enables you to turn different zones on & off from your smartphone

## ► DEMAND RESPONSE CAPABLE\*

The Demand Response Modes may be activated by the electricity supplier during periods of peak grid demand. Some electricity suppliers provide a rebate when a Demand Response Capable air conditioner is installed. You should consult your electricity supplier for further information, including rebate conditions.

\*Standard models require additional purchase of the Dry Contact accessory Part No. PQDSRCDUMO to become Demand Response Capable. A Demand Response Enabling Device (DRED) is required at the time of installation to activate the demand response modes.

Available from your installing electrician.
